

CHEMICAL SUPPLY CHAINS ARE BEING TESTED.

Dixie Chemical = Stability Amid the Storm

Tariffs. Port congestion. Raw material shortages. You've heard it all before—and you've probably felt the impact. That's why Dixie can help give U.S. manufacturers one thing they're not getting elsewhere: reliable access to high-performance specialty chemicals, free from international chaos.

WHAT WE OFFER:

- **Tariff-Free NMAs, ECAs, and Intermediates**
U.S. manufacturing means you're protected from price shocks.
- **Faster, Predictable Lead Times**
Domestic supply chain = no overseas delays or customs bottlenecks.
- **Proven Partner** - Decades of expertise, proven solutions.
- **Strategic Flexibility**
Adjust to volatility without losing control of your production timelines.

CHALLENGES

- Is global uncertainty creating problems in your supply chain?
- Are you struggling to plan due to cost swings and unpredictable delivery schedules?
- What would it mean for your business to have a stable, U.S.-based chemical supply?

HOW DIXIE CAN HELP

- Dixie was built for manufacturers like you—who can't afford the risk of sourcing abroad.
- We're giving our partners one less thing to worry about by bringing proven chemical performance closer to home.
- No ever-changing costs. No guessing games. Just consistent supply when and where you need it.

REFRAMING THE RISK:

- With global disruptions growing, how much longer can you afford the gamble of importing?
- Let's compare the total cost of international sourcing vs. the reliability of a domestic partner.
- We've helped companies move off imports with minimal disruption—let us show you how.
- We'd love to run a quick review of how much risk you're currently exposed to—and how we can reduce it.

We'd love to run a quick review of how much risk you're currently exposed to—and how we can reduce it.
